Re: GN Docket No. 15-319, CommScope Spectrum Access System Certification Final Test Report

Dear Ms. Dortch:

CommScope submitted a cover letter and our Spectrum Access System (SAS) Certification Test Report that indicates the CommScope SAS passed all tests administered by ITS in the SAS testing phase that concluded on April 30, 2019. The remainder of the report contains highly confidential test results information.

Comsearch, a CommScope Company, requests confidential treatment of this report in order to protect our evolving business and technology strategies. The information we seek to keep confidential includes control, sensing, and communications information relating uniquely to its ESC capability. Because ESC services will be provided in a competitive environment, disclosure of this sensitive and proprietary information, which Comsearch has not made publicly available, could result in substantial competitive harm to Comsearch. Consistent with 47 C.F.R. § 0.459, Comsearch requests notification if release of confidential information is requested pursuant to the Freedom of Information Act or otherwise.

Please feel free to contact me if you should have any questions or if you require any additional information.

Respectfully Submitted,

/s/ H. Mark Gibson
